/dev stage="embryo 13.5.14.5.16.5.17.5dpc"
/lab_host="mbH108 (T1 phage resistant)"
/lab_host="DH108 (T1 phage resistant)"
/clone="Organ: Brain; Vector: pVX- Asc; Site 1:
Site 2: Not 1; The library was constructed accc
Bonaldo, Lennon and Soares, Genome Research, 6:
1996. Denatured RNA was size fractionated on a
gel. First strand cDNA synthesis was primed wit
primer containing a Not I site. Double strand
size selected according to mRNA size fraction,
with EcoR i adaptor, digested with NotI and the
directionally into pYX-Asc vector. The library
sequence located between the Not I site and the
la AGCAGAGAG. This library was created for the
lowa Brain Anatomy Project (BMAP): 'Gene Discov
Developing Mouse Nervous System', supported by
Institute of Mental Health (NIMH), Hemin Chin, DNA Sequencing by: Dr. M. Bento Soares, University of : Clone Distribution: Distribution information can be for http://genome.uiowa.edu/distribution/mousefl.html This clone was contributed by the Brain Molecular Anata (BMAP) organiem="Mue musculus" /clone="IMAGE:30355746" db xref="taxon:10090" program coordinator. RIKEN. Division of Experimental Animal Research contributed to prepare mouse tissues. 1st stran primed with a primer [5' prepared by using trehalose thermo-activated retranscriptase and subsequently enriched for ful cap-trapper. cDNA went through one round of sub Rot = 100.0 Second strand cDNA was prepared wit primer adapter of sequence [5' was prepared wit primer adapter of sequence [5' was cloned into the XhoI and BamHI sites. Vecto modified pBluescript KS(+) after bulk excision FLC I. Cloning sites, 5' end: Sall; 3' end: Bam
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 BQ258274 664 bp mRNA linear EST (NISC_kpl1g04.q3 Baker mouse embryo e7.5 Mus musculus CDN?

TRIP polypeptide. The protein is used in the method of the inverse properties. The protein is used in the method of the inverse pecification describes a method for activating a T lymphocy comprising contacting the T lymphocyte with a dendritic cell the expresses a TRT peptide in the context of a MHC class I or MHC molecule. The protein causes induction of an in vivo immunologic response to telomerase activity. Cancer cells are characterized expression of endogenous TRT gene and the presence of decetable telomerase activity. Therefore, by eliciting a specific immune to TRT or to TRT-expressing cells, it is possible to selectively proliferating cells, it is possible to selectively continuing an in vivo immune response to telomerase by activating lymphocyte, and is useful for prevention and treatment of cancer conterpression diseases/conditions

The invention relates to a mouse telomerase reverse transcripta enzyme. Compositions containing mTERT can be used in telomere I assays. Isolated mTERT is useful as an immunogen for the produc monoclonal or polyclonal antibodies. The method is useful for a the degree of purification and identification of new mTERT spea as an mTERT allele, homolog or isoform, or to screen for modula (antagonists and agonists) of telomerase-mediated DNA replicati Antagonists and agonists of mTERT can be used to modify the act other telomerase enzymes such as human TERT (HTERT). The presen represents a human TERT enzyme

Vaccine for initiating and enhancing a cytotoxic T lymphocyte refor treating cancers or tumors or for inducing immune response tumors, comprises a telomerase reverse transcriptase peptide.

Disclosure; Fig 5; 52pp; English.

The present sequence is that of human telomerase reverse transcr (hTRT). The sequence was analysed for 9-mer peptide sequences oc known binding motifs for the human leukcyte antigen HLA-21 mc From an initial panel of about 30 candidate peptides, 2 sequence denoted p540 (see AAB82772) and p865 (see AAB82773), were examined to healthy individuals as well as patients with prostate majority of healthy individuals as well as patients with prostate immunised in vitro against these 2 HLA-A21. restricted peptides preficionly lysed a variety of HLA-A21 restricted peptides in PTRT-specific cytotoxic T lymphocytes (CTL). The cancer patients prostate, breast, colon, lung and melanoma, demonstrating immunc recognition of endogenously-processed hTRT peptides. In vivo into for than A21. transgenic mice generated a specific CTL response againt the susceptibility to lysis of tumour cells of various origin both hTRT peptide in an inversal cancer vac humans. Thus, a claimed universal vaccine for treating et unmours origin comprises at least 1 hTRT peptide in an amount effective infinating and enhancing a CTL response against cancer cells. The binding to the major histocompatibility complex. Also claimed is binding to the major histocompatibility complex. Also claimed is cells with the pulsed leucocytes. A method for targeting contacting cells with the pulsed leucocytes. A method for targeting a hTRT peptide mammal, especially a cancer parter. especially a cancer patient

The invention relates to animal tissues with carbohydrate antige are compatible for transplantation into human patients. The mam cell is inactivated homorygoushy for expression of alpha(1,3) gai transferase (alpha1,3T7) gene and comprises a transgene for alph fucosyltransferase (alpha1,2FT). It is useful for producing anim with carbohydrate antigens that are compatible for transplantationamen patients. The present sequence is human telomerase reverse transcriptase (TERT) used in the invention
                                                                                                                                                                                                                      Carbohydrate antigen; alpha(1,3)galactosyltransferase; alpha1,3 transgenic; alpha(1,2)fucosyltransferase; alpha1,2FT; human; en telomerase reverse transcriptase.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       DARPPPAAPSFROVSCLKELVARVLORLCERGAKNVLAFGFALLDGARGGPPEAF

2002-075321/10. N-PSDB; AAS96607. New compound targeted to nucleic acid molecule encoding telomer transcriptase (TERT), which specifically hybridizes with and in expression of TERT, useful for modulating apoptosis and inhibit

Disclosure; Page 100-105; 154pp; English.

growth

The invention describes a compound, 8-50 nucleobases in length to a nucleic acid molecule encoding human TERT (telomerase reversal transcriptese), where the compound specifically hybridises with inhibits the expression of TERT. A series of oligonucleotides we designed to target different regions of the human TERT RNA. The nucleotides in length and composed of a central gap region cons ten? "deoxynucleotides, flanked on both sides (5' and 3' direction ten 2' deoxynucleotides, flanked on both sides (5' and 3' direction. The vings. The wings were composed of 2'-methoxyeth C five-nucleotides. The compounds were analysed for their effect of TERT mRNA levels by reverse transcriptaes (RT)-polymerase chain (PCR). The compound is useful for inhibiting the expression of C cells or tissues, for treating a human having disease or conditions associated with TERT, for modulating apoptoasis, for inhibiting of growth (preferably, cancer cell growth), in antisense therapy and agnostics and therapeutics. This is the amino acid equence of tellomerase reverse transcriptase (TERT), described in the method

The present sequence is the protein sequence of human telomerase transcriptase (TERT). The invention relates to the discovery the stranded interfering RNAs, such as short interfering RNAs (sirk) target telomerase RNA or TERT mRNA are capable of inhibiting telestation of telomerase in cancer cells leads to telestactivity. Inhibition of telomerase in cancer cells leads to telestactivity. Inhibition of telomerase in cancer cells leads to telestaction; end-to-end chromosomal fusion, and apoptosis. Intercell contraception or sterilisation, for immunosuppression, for treater yeast, parasite and fungal infections, and in antiinflammatory (As telomerase is active in a limited number of cell types, e.g. cells, germline cells, certain stem cells of the haematopoietic and B cells, sun-damaged skin, and proliferative cervix, most not cells are not affected by telomerase RNA interference therapy and and targo 181 ATQARPPHASGPRRRLGCERAMNHSVREAGVPLGLPAPGARRRGGSASRSLPLF 241 GAAPEPERTPVGQGSWAHPGRTRGPSDRGFCVVSPARPAEBATSLEGALSGTRHS PAAGVCAREKPQGSVAAPEEEDTDPRRLVQLLRQHSSPWQVYGFVRACLRRLVPP-DARPPPAAPSFROVSCLKELVARVLORLCERGAKNVLAFGFALLDGARGGPPEAI DARPPAAPSFRQVSCLKELVARVLQRLCERGAKNVLAFGFALLDGARGGPPEAF ATQARPPHASGPRRIGCERAMNHSVREAGVPIGLPAPGARRRGGSASRSLPLF GAAPEPERTPVGQGSWAHPGRIRGPSDRGFCVVSPARPAEEATSLEGALSGTRHS ROHHAGPPSTSRPPRPWDTPCPPVYAETKHFLYSSGDKEQLRPSFLLSSLRPSLT 301 RQHHAGEPSISRPPRPWDIPCPPVYAETKHFLYSSGDKEQLRPSFLLSSLRPSLT VETIFLGSRPWMPGTPRRLPRLPQRYWQMRPLFLELLGNHAQCPYGVLLKTHCPL PAAGVCAREKPQGSVAAPEEEDTDPRRLVQLLRQHSSPWQVYGFVRACLRRLVPP RHNERRFLRNTKKFISLGKHAKLSLQELTWKMSVRDCAWLRRSPGVGCVPAAEHR MPRAPRCRAVRSLLRSHYREVLPLATFVRRLGPQGWRLVQRGDPAAFRALVAQCI **MPRAPRCRAVRSLLRSHYREVLPLATFVRRLGPQGWRLVQRGDPAAFRALVAQC** SYLPNTVTDALRGSGAWGLLLRRVGDDVLVHILLARCALFVLVAPSCAYQVCGPPI Length 1132; Novel double-stranded short interfering RNA having sense and ancies acids which are complementary to each other and to tanacid e.g., telomerase RNA or mRNA encoding telomerase reverse transcriptase. 0; Indels . 9 ВВ Query Match

```
The present sequence is that of human telomerase reverse transc (TERT). The invention relates to the discovery that double-stra interfering RNAs, such as short interfering RNAs (SIRNA), which concerns RNA or TERT mRNA are capable of inhibiting telomerase activity. Inhibition of telomerase in cancer cells leads to tel shortening, end-to-end chromosomal fusion, and apoptosis. Intertelomerase activity can also be used for treatment of inheartilic contraception or sterilastion, for immunosuppression, for treatment, parasite and fungal infections, and in antiinflammatory as telomerase is active in a limited number of cell types, e.g. cells, germline cells, certain stem cells of the haematopoietic and B cells, sun-damaged skin, and proliferative cervix, most needs of the large of the large.
                                                                                                        Novel nucleic acid encoding or comprising interfering RNAs whi telomerase RNA, useful for inhibiting telomerase activity for cancer, infertility and disorders of the immune system.
                                                                                                                                                                                                 Disclosure; Fig 4; 52pp; English.

or treating wounds and enhancing epithelization of a skin prises vector encoding telomerase reverse transcriptase or spithelial cells on a microparticle or a matrix. for treating wounds

age 32; 68pp; English.

ompribing a vector encoding telomerase reverse transcriptuse (an excipient inventor) comprised a vector encoding telomerase reverse transcriptuse (an excipient or device, or comprises telomerised epithelial cell microparticle or a matrix suitable for topical administration or administration or administration or administration or administration or administration or a wound site. (1) has vulnerary and antiulcer useful for treating a wound and enhancing epitheliantion of a shourface. The wound is especially skin wound including acute less as traumatic lesion, burn, or surgical incision, chronic lesion chronic beach is further monitored for closure. The telomerase activity or TER expression is increased in epithelial cells at the site of treatment is further monitored for closure. The telomerase activity or TER expression is increased in epithelial cells at the site of treatment of its further monitored for closure. The telomerase activity or TER expression is increased in epithelial cells are especially kertaincytes. A polymocleotide TERT is useful for the preparation of a medicament for the treatment of a wound or an epithelial surface in a human or animal. (1) is also useful for treating wounds of other wounds or animal. (1) is also useful for treating wounds of other conformant animal. (1) is also useful for treating wounds of other conformant animal. (1) is also useful for the present sequence refundant that the sexemplification of the human TERT (hTERT), which is given in the exemplification of the invention. hTERT is located to chromosome 5 181 ATGARPPHASGPRRRLGCERAWNHSVREAGVPLGLPAPGARRRGGSASRSLPLP LSEAEVRQHREARPALLTSRLRFIPKPDGLRPIVNMDYVVGARTFRREKRAERT; 1 MPRAPRCRAVRSLLRSHYREVLPLATFVRRLGPQGWRLVQRGDPAAFRALVAQCL DARPPPAAPSFRQVSCLKELVARVLORLCERGAKNVLAFGFALLDGARGGPPEAF 61 DARPPPAAPSFRQVSCLKELVARVLQRLCERGAKNVLAFGFALLDGARGGPPEAF SYLPNTVIDALRGSGAWGLLLRRVGDDVLVHLLARCALFVLVAPSCAYQVCGPPL ATQARPPPHASGPRRRLGCERAWNHSVREAGVPLGLPAPGARRRGGSASRSLPLP GAAPEPERTPVGQGSWAHPGRTRGPSDRGFCVVSPARPAEEATSLEGALSGTRHS GAAPEPERTPVGGGSWAHPGRIRGPSDRGFCVVSPARPAEEAISLEGALSGIRHS ROHHAGPPSTSRPPRPWDTPCPPVYAETKHFLYSSGDKEQLRPSFLLSSLRPSLT ROHHAGPPSTSRPPRPWDTPCPPVYAETKHFLYSSGDKEQLRPSFLLSSLRPSLT VETIFLGSR PWMPGTPRRLPRLPQRYWQMRPLFLELLGNHAQCPYGVLLKTHCPL VETIFLGSRPWMPGTPRRLPRLPQRYWQMRPLFLELLGNHAQCPYGVLLKTHCPL PAAGVCAREKPQGSVAAPEBEDTDPRRLVQLLRQHSSPWQVYGFVRACLRRLVPP PAAGVCAREKPQGSVAAPEEEDTDPRRLVQLLRQHSSPWQVYGFVRACLRRLVPP RHNBRRFLRNTKKFISLGKHAKLSLQELTWKMSVRDCAWLRRSPGVGCVPAAEHRI LAKFLHWIMSVYVVELLRSFFYVTETTFOKNRLFFYRKSVWSKLOSIGIRQHLKRV LAKFLHWLMSVYVVELLRSFFYVTETTFQKNRLFFYRKSVWSKLQSIGIRQHLKRV LSEAEVROHREARPALLTSRLRFIPKPDGLRPIVNMDYVVGARTFRREKRAERLT: 1 MPRAPRCRAVRSLLRSHYREVLPLATFVRRLGPQGWRLVQRGDPAAFRALVAQCI ó Length 1132; Indels DB 6; ,0 present invention describes a pharmaceutical Query Match 100.0%; Score 5961; Best Local Similarity 100.0%; Pred.
